## **Vital Records Can Now be Requested Online**

Wichita Falls, TX- The Wichita Falls – Wichita County Public Health District is pleased to announce the availability of a web-based portal, VitalDirector, for qualified applicants to make requests for certified birth (for anyone born in Texas) and death (for those who died within the city limits of Wichita Falls) records.

VitalDirector is a product of Permitium, which is a leading provider of cloud-based software for vital records offices around the country focused on extending government services to communities. VitalDirector offers citizens the ability to manage the processing, payment, and issuance of birth and death certificates online. Requestors are able to schedule a time for pickup of vital records, which cuts down on wait time and provides improved efficiency for staff.

“We have partnered with Permitium to give customers a fast, easy, and affordable way to request certified copies of birth and death certificates online,” says Amy Fagan, Interim Director of Health. “The ordering process with VitalDirector ensures statute compliance, accelerates turnaround time, increases security, automates, tracks, organizes, and streamlines vital record ordering for applicants.”

Access to the portal can be found at [www.health.wichitafallstx.gov](http://www.health.wichitafallstx.gov)
