### **COVID-19 Vaccine Waiting List Update**

Wichita Falls, Texas – As the Texas Department of State Health Services continues their vaccine allocation distribution, the Wichita Falls – Wichita County Public Health District is planning to update their processes to better serve the public. Upon formal approval, they will transition to an online, high-volume vaccine management and reporting system. This system will automate the vaccination process, including appointment scheduling, documentation, and tracking of all vaccine batch information and inoculations. If approved, the management system can be installed, implemented and working in 48 to 72 hours from the purchase date.

In preparation for the possible change and due to the extremely large amount of people already on the waiting list, vaccine sign-ups will be temporarily paused. Individuals who are already signed up on the Health District's current list will not lose their place and will be transitioned to the new system.

The Health District's current waiting list will still be used to fill appointment slots for this week's upcoming mass vaccination clinic. The Health District is still awaiting the vaccines arrival and will inform the public when the clinic date has been decided.

Please continue to follow [wichitafallstx.gov](http://wichitafallstx.gov) and the City of Wichita Falls social media platforms for COVID-19 updates.
