## **Wichita Falls Health Inspection Scores to be Found at New Website**

Wichita Falls, Texas- The Wichita Falls-Wichita County Public Health District has upgraded their current software system to a new vendor, Hedgerow.

This new system will enhance the staff's ability to conduct and document inspections for the types of permits that are issued, to include food, body art, on-site sewage facilities (OSSF), and aquatic facilities.

The restaurant inspection scores are now visible via their new portal as part of this conversion. The inspection scores can be found via the button on the Health District's homepage or by scanning the QR code on a Facility's Permit. <https://www.wichitafallstx.gov/55/Health-District>

This technology improvement is part of the Health District's strategic plan to improve the experience for customers as well as the efficiency of staff.

The new vendor for this project was approved by the City Council in October 2023. Staff have been working with the new company since that time to ensure a successful conversion.
